Art Unit: 3683

1. Receipt is acknowledged of the preliminary amendment filed on 6-30-2003.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wydler et al.

Note motors 15 and output gear 4.

Re-claim 2, note gear train 14.

Re-claim 3, note worm gear 3.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3683

6. Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wydler et al.

The claimed invention differs from Wydler et al. only in the type of gears.

Re-claims 8-10, it would have been obvious to one of ordinary skill in the art to have utilized a planetary gear and sun gear as a mere substitute of known equivalent gearing mechanisms.

7. Claim 41 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. As to claims 33-40, these claims relate to a non-elected invention that include a clutch.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tyan and Blom show multiple motor gear drives.
